+1 (585) 469-6158 | akhil.palepally1@gmail.com | Rochester, NY, USA | linkedin.com/in/akhil-palepally/

PROFESSIONAL SUMMARY

CS and Economics student at RIT building tools I'd actually use: an AI self-improvement system, an algorithmic trading backtester, and a club management platform. I work across Python, React, FastAPI, TypeScript, and Java.

EDUCATION

Rochester Institute of Technology
Bachelor of Science (BS), Computer Science

August 2025 - May 2030
GPA: 3.8

Rochester Institute of Technology
Bachelor of Science (BS), Economics

August 2025 - May 2030
GPA: 3.8

PROFESSIONAL EXPERIENCE

Rochester Institute of Technology
Student Employee, Corner Store

August 2026 - Present
Rochester, NY, USA

- Worked as a student employee at RIT's on-campus Corner Store, handling cash register operations and processing customer transactions accurately in a high-traffic retail environment
- Delivered attentive customer service to a diverse campus community while maintaining a friendly and professional demeanor
- Supported daily store operations including inventory management, restocking, and maintaining an organized workspace
- Demonstrated consistent reliability, teamwork, and time management while balancing academic responsibilities alongside work commitments.

RIT AI
Treasurer

August 2026 - Present
Rochester, NY, USA

- Served as Treasurer of RIT's AI Club, overseeing the club's finances, budgeting, and sponsorship strategy
- Spearheaded outreach efforts that successfully grew the club's sponsor base, designing a tiered sponsorship system to attract and retain industry partners at varying levels of engagement
- Developed TreasurerAI, an internal application leveraging AI to streamline treasury workflows, automating expense tracking and simplifying the submission of financial forms. Collaborated closely with club leadership and navigated university financial processes to ensure compliance and fiscal responsibility.

PROJECTS & OUTSIDE EXPERIENCE

FinRL Extension
Frontend Developer

March 2026 - April 2026
Rochester, NY, USA

- Collaboratively built the React frontend for a financial analysis platform that leverages MCP architecture and multiple AI backends (Claude, Gemini, Perplexity) to deliver stock research, dynamic charts, and professional PDF reports
- Developed the chat interface, AI response rendering, sidebar navigation, and a PDF preview overlay for inline report viewing using react-pdf.

TaigaBot
Full-Stack Developer

June 2026 - July 2026
Rochester, NY, USA

- Built and deployed a multi-server Discord bot for the RIT AI Club and broader RIT student organization ecosystem. TaigaBot handles RIT email verification to keep servers student-only, member moderation, leveling and engagement tracking, data backups, and an AI assistant powered by the Google Gemini API along with stem tools to search for research papers.
